

Curriculum Companion Kits

Every student equipped equally

Hands on Additive

Our Companion Kits provide an extension to digital learning with a hands on additive. Bringing the classroom tools to the student. Science Experiments, STEM projects, Art, Maps and Math tools.

Kit Creation

Education Providers create supply kits to MATCH their lesson plans. Customized for each program, grade, and or subject. NERD also provides a BASE kit to build from.

Volume Advantage

NERD will source the items you require taking the searching and procurement off of your plate. Schools will inevitably have crossover with supply items and we provide exceptional pricing because we are ordering in such large quantities.

Customized Assembly

Within our warehouse we disassemble bulk items and prepare items for kits. Counting 25 buttons and bagging etc. to place into a larger art kit. All customized. Creating and labeling per grade, subject and program.

Distribution

NERD can bulk ship your assembled kits to you for distribution or send directly to students. Kits are in home for the start of the school year or semester.
